Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

12/4/2014 at 13:33, on location. Met with report contact. Personnel currently loading impacted snow/dirt into sidedump with a front loader. Spray came out of flare pit in a fan shape, roughly due north to due east, with the furthest impact being noted in a northeasterly direction. Some impacted snow still visible. Met with report contact and pointed out the spots, primarily due north and right along the treeline to the northeast. There is another spill currently being cleaned up by the company. Once that cleanup is complete, equipment will be moved back to this site to finish up.

Date: 4/21/2015 **Status:** Inspection
